Examiner's Amendments to the Specification

In page 1, underneath the title insert the following:

---- This application is a 371 of PCT/IB04/03352 filed 9/24/2004, which claims priority to U.S. Provisional applications 60/505,161 and 60/530,418, filed 9/24/2003 and 12/18/2003 respectively. ---.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 9-32, 54-57 are directed to fusion polypeptides of CC2 and LZ domains of both human and murine NEMO polypeptides each of specific amino acid sequence or specifically claimed variants thereof together with a polypeptide that readily traverses the cellular membrane resulting in the internalization of the fusion polypeptide into the cellular milieu and specifically claimed methods of use thereof.

Claimed fusion polypeptides are free of prior art. Further the prior art fails to suggest such specifically claimed products. Hence, said products are also non-obvious.

Serial Number:10/573,161
Art Unit 1656

Since said fusion polypeptides are both novel and non-obvious, specifically claimed methods of use thereof are also novel and non-obvious.

Claims 9-32 and 54-57 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
